

Didit Eko Setyo Ariandi

Data Scientist

+6285216313851 | diditekosetyo@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Jakarta, Indonesia

SUMMARY

Experienced Data Scientist with a strong background in Python, SQL, ETL pipelines, and deep learning. Proven ability to analyze complex datasets and uncover actionable insights that drive business value. Skilled in data manipulation, visualization, and predictive modeling, enabling informed and strategic decision-making. Collaborative and results-oriented, with a track record of working effectively across cross-functional teams to transform business needs into impactful data-driven solutions.

EXPERIENCE

PT Bigjava

Yogyakarta, ID

Data Scientist - Full Time

Feb 2023 – Present

- Build and deploy Machine Learning models for Sentiment Analysis with 95% accuracy.
- Designed and implemented scalable data pipeline structures to automate data ingestion, preprocessing, and model deployment workflows.
- Develop an algorithm using Natural Language Processing models for Emotion Detection with 90% accuracy.
- Develop and build unsupervised Natural Language Processing Topic modeling to extract topics from a large dataset.
- Built and fine-tuned Named Entity Recognition (NER) models to extract key entities such as names, locations, and organizations.
- Build Fast Api to serve ML models, enabling seamless integration with the backend and frontend teams.
- Develop algorithms for Data Cleaning and preprocessing on large datasets.
- Integrated ChatGPT API, Claude API to generate automatic text responses and content summaries based on input topics

PT Dirgantara Indonesia

Bandung, ID

Engineering - Internship

July 2019 – Oct 2019

Worked as an intern and received work of a safety assessment for installed Machine Gun for Helicopter Bell412 :

- Conduct helicopter safety inspections with an understanding of the minimum safety level and safety assessment process in the military.
- Identify potential hazards during conceptual design and Understand risk assessment methods to determine mitigation measures.
- Provide a solution to the risk of danger that will occur to the helicopter such as: use bolt with wire locking minimum 4 pieces and installing the appliance detector/overheating and emergency button release.
- Determine the risk assessment method to determine the size of the mitigation.
- Create a final conceptual design after determining hazard analysis and determining mitigation measures.

EDUCATION

Hacktiv8 Indonesia, Full Time Data Science

Bandung, ID

Courses: Calculus, Statistics, Machine Learning, Deep Learning, Python (Numpy, Pandas, Matplotlib, Seaborn, Scikit Learn, Tensorflow, Keras, Streamlit), SQL

Aug 2022 - Okt 2022

Institut Teknologi Dirgantara Adisutjipto

Yogyakarta, ID

Bachelor of Aerospace Engineering

Sep 2016 – Aug 2021

Cumulative GPA: 3.28/4.0

PROJECTS

Social Media Data Pipeline with Airflow, Kafka, Spark, and BERT

Jun 2025

This ETL pipeline is an end-to-end data engineering and machine learning project designed to collect, process, analyze, and store Twitter data for sentiment analysis. It leverages modern big data tools and orchestration platforms to simulate a real-world data pipeline in production.

Sentiment Analysis Bert

Mar 2025

Preprocessed large data with Spark and made predictions Harvest models used Bert model with accuracy 89%

Harvest Regression Models

Okt 2024

Make predictions Harvest models using Random Forest Regression, Decision Tree Regression and Naive Bayes with 86% accuracy.

Customer Churn Prediction

Okt 2022

Make predictions on customer churn or people who potentially leave as customers not for next month. Using ANN Deep learning from Tensorflow.

Prediction on Customer Credit Default

Sept 2022

Classification model to predict customer who will have default status on their next month payment using Logistic Regression

SKILLS

Programming Languages : Python

Database : SQL, BigQuery,PostgreSql,MongoDB

Frameworks and Tools : Tensorflow, Keras,Pytorch, Visual Code Studio, Google Collab, Apache Spark,Apache Kafka,Hadoop.

Data Visualization : Tableau, Google Data Studio,Apache Superset

Languages : Fluently in Bahasa, Professional Proficiency in English

Certifications & Training: IBM Data Science Specialization, Google Data Analytics,Hacktiv8 Full Time Data Science
